II. Mining and Reclamation

1. Was the mine active during the past year? Yes ☒ No ☐
2. If active, how much ore or mineral was mined? 56.2 million short tons
3. How much additional acreage was disturbed during the past year?
approximately 300 acres
4. Briefly describe any new or additional surface disturbances that occurred during the past year. This description should include the type of work performed, and volume of material moved.

The 300 acres disturbed in 1995 was the result of earthwork preparations on the west side of the existing tailings pipeline for the construction of a second tailings pipeline within the approved pipeline corridor. The disturbance included a 50' wide flat area on the west side of the existing pipeline. In addition, slopes left at angle of repose from the original pipeline construction were laid back to a 3H to 1V slope on the west side of the existing pipeline. Reclamation in many of these areas began in 1995 and will be completed in 1996.

It should also be noted that disturbances associated with the new tailings expansion are documented in the annual report M/035/015.

5. How much acreage was reclaimed during the past year? 323 acres hydro-seeding and 359 acres drill seeding
